

The lessons began as the dream was started with a plan, she knew she wanted a red and/or lacy prom dress and was excited that this would be a way for her to save money while learning along the way.

The project has been a labor of love. "There have been days I wanted to cut it up or burn it because it's so much harder than it looks," Swanson said.

As she is nearing the end of her project, in regards to all that hard work, Swanson notes, "it will definitely be worth it when I get to wear it to prom!"

Swanson hopes to become an English teacher someday, but is confident she will continue to sew! Her next project? Swanson hopes to sew a dress for her High School graduation.

Labor of Love

Have you ever wanted to cut up or burn your prom dress? If you answered no to that question then you probably didn't sew your own dress like North Central High School senior, Shay Swanson, is in the process of.

Swanson spoke with Fashion & Textiles teacher Mrs. Kendra Scanlon prior to enrolling for another term of her class about creating her own prom dress from start to finish. Scanlon, a seamstress herself, knew this was not an easy task but was eager to teach Swanson all she knew so that she could help make this dream a reality.

Swanson enrolled in Fashion & Textiles 2, a Fine Art elective for graduation Pathways requirements.

AP US History reflects on the past to help build a brighter future

Mrs. Asche's Advanced Placement US History class visited the Wonder Lab earlier this month to complete a creative build project based on their unit from the Civil War Era of 1848-1877.

Students were able to reflect on the past to help build a brighter future by coding with Ozobots, exploring the Civil War through the lab's virtual reality goggles, creating figures with a 3D pen, among many other STEAM learning opportunities linked to US History you typically don't get in the daily classroom setting.

"I was quite impressed at what they produced. One group even created a video using the stage and green screen," said Mrs. Asche.

The class also created an Instagram wall which will proudly hang in the halls of North Central for all of the students and staff to enjoy.

Asche added, "they really enjoyed the time and learned a lot!"

Wonder Lab coordinator, Gretchen Brown, welcomes Northeast School Corporation teachers to schedule a time when their class can utilize the facility. "There is so much to do there. It is a great space for students to create whatever they can think up. Had I known what all they could accomplish, I would have planned for a full day instead of a half day," Asche said.

WOW Carts

North and East Elementary schools are home to new "Wonder Lab on Wheels" carts (WOW carts) delivered earlier this month. The WOW carts were developed this summer, partially designed by North Central High School students, funded by a combination of grants as well as some previously purchased supplies and completed with task cards by Wonder Lab coordinator, Gretchen Brown.

"A large supply of multi-use tools are included in the WOW Cart, as well as a variety of open-ended task cards. We can also loan items from the Wonder Lab on a scheduled basis for classroom use. We are excited for the WONDER to follow," said Ms. Patty Walters.

The goal of the WOW cart is for students to have supervised, hands-on exploration of scientific concepts that dovetail with ongoing classroom instruction. The instruction could be in any content area that leans itself to connections with such use. Reading and Writing assignments could easily be linked. Obvious Math connections are included in the task cards, and the Design Process of Science is ready to go! Utilization of the WOW carts Prioritize STEM as a component to their weekly education.

3D Print Workshop

Northeast School Corporation leads the way by offering a 3D Print workshop for students in 5th - 8th grades.

3D printing in school fosters students' creativity which helps develop their passion for innovation and original thinking as well as developing their self-confidence, enabling them to pursue challenging courses in STEM.

The workshop was instructed by North Central High School teacher Mr. Jeff Ransford. It introduced students to a tiny manufacturing plant and prototyping tool right inside the school and encouraged students to bring their imaginations to life to solve real life problems.

NESC Upcoming Dates

Friday, March 6th

End of 3rd grading Period

Friday, March 20th

No School (Makeup day #3 if needed)

Monday, March 23rd - Friday March 27th

Spring break

Thursday, April 2nd

NE East Elementary Kindergarten roundup

Friday, April 3rd

NE North Elementary Kindergarten roundup

Pictured above: NCHS Ladybirds are back to back sectional champions! Congratulations ladies, we are proud of you!
